

Announcing OREIS™ MobileWeb: Operation Respond's New Wireless Incident Information Service for Emergency Responders

Emergency responders often encounter hazardous materials that require prompt decision making based on solid information and action guidance. *OREIS™ MobileWeb*, the database-only version of the Operation Respond Emergency Information System (OREIS™) provides you with that critical action information, by means of a new web-based application we developed for wireless platforms.

Using *OREIS™ MobileWeb*, you can obtain immediate information and action guidance to deal safely with hazardous materials wherever law enforcement and fire, EMS or rescue services may be required. *OREIS™ MobileWeb* also provides reliable, easy-to-use hazardous materials response data and guidance to assist transportation, chemical industry, warehousing and logistics professionals working in cooperation with responders at incidents.

We believe this new application will enhance safety and mission effectiveness – because lifesaving hazardous materials information is put directly in the hands of responders and the public, where and when they need it.

In addition to searchable placard and UN ID information from the North American *Emergency Response Guidebook*, OREIS™ MobileWeb currently includes the following user-searchable databases:

- US Coast Guard Chemical Hazards Response Information System (CHRIS)
- Association of American Railroads (AAR) Bureau of Explosives Chemical List
- AAR 20 Most Carried Chemicals
- NIOSH Target Organs Emergency Medical Database
- NIOSH International Chemical Safety Cards
- Department of Energy WMD Chemical and Biologic Agents Lists

OREIS MobileWeb also contains a chemical database search feature that allows you to enter the first three letters of the chemical name, and scroll until you find the exact name in full, minimizing errors from misspellings and response time lost.

***OREIS™ MobileWeb* is available from Operation Respond for \$4.95 per month, based on an annual subscription price of \$59.40 per year.**

***OREIS™ MobileWeb* is also sold by AccuWeather, Inc. as a joint application with AccuWeather.com Premium – AccuWeather's renowned severe weather monitoring and warning system. For further information on both options, please contact Operation Respond at www.oreis.org or call us at 202-548-0935 and leave a voicemail.**
